- **Languages:** HTML, CSS, JavaScript, TypeScript, jQuery
- **Technologies:** React.js, Next.js, Tailwind, Bootstrap, GitHub, daisyUI, Photoshop (PSD), Material UI, Firebase, Sass, vitest, testing library, Docker

• Soft Skills

- Problem-solving and analytical thinking
- Effective communication and collaboration
- Attention to detail and UI/UX sensibility
- Project management and prioritization

Education

Higher Institute of Computer Science and Information

Graduated 2021

Computer Science

- **Major:** Computer Science
- **Graduation Project Degree:** Excellent
- **Graduation Project:** 3 Level Authentication Password

Projects

Simple Dashboard - Business Management Platform | HTML5, CSS3, JavaScript, Typescript, React, Next.js, Tailwind CSS, Chart.js

- Built a comprehensive admin dashboard with 5 main modules for business management and analytics, featuring responsive design across all devices. Key features include:
 - * Home dashboard displaying key metrics: total clients, account balance, new sales, recent transactions, and product performance analytics
 - * Advanced analytics module with congratulations cards for best sellers, monthly revenue charts, total profit visualization, sales by country breakdown, and deposit/withdraw tracking
 - * User management system with advanced filtering by roles, plans, and statuses, plus real-time search functionality by name or email
 - * Comprehensive user profiles featuring avatar display, role-based information, location and availability status, team collaboration details, and project management with progress tracking
 - * Settings panel with read-only user information including personal details, contact information, organizational data, and localization preferences
 - * Integrated notification system and theme switcher supporting light/dark modes for enhanced user experience
- **Live Demo**

YallaNShop - E-commerce | HTML5, CSS3, Tailwind, JS, React, Next.JS, Typescript, MaterialUI, SASS, Redux, Firebase

- Developed a responsive e-commerce platform using Next.js and React, showcasing a range of products across multiple categories. Key features include:
 - * User authentication via Google and email/password, implemented with Firebase
 - * Home page highlighting featured items and promotions
 - * Product catalog with category-specific pages for easy browsing
 - * User-friendly cart system for seamless checkout process
 - * Favorite items list for quick access to frequently viewed products
 - * About page providing company information and mission statement
- **Live Demo**

E-commerce | *HTML5, CSS3, Tailwind, JS, React*

- Developed a comprehensive e-commerce web application featuring robust user authentication, intuitive product browsing, and a secure checkout process. The platform includes dynamic sliders for main products and categories, extensive product search, a detailed shopping cart system, and flexible payment options. Additionally, the application supports order tracking and management, enhancing the overall user experience and operational efficiency.
- **Live Demo**

Weather App | *HTML5, CSS3, Tailwind, JS, React, DaisyUI*

- Developed a comprehensive Weather App with multiple features, including:
 - * **Current Weather & 7-Day Forecast:** Provides real-time weather updates and a detailed forecast for the next 7 days.
 - * **Prayer Times Integration:** Displays accurate prayer times based on the user's location.
 - * **Favorites & Search Functionality:** Allows users to save favorite cities and search for weather data for specific locations.
 - * **Random Ayah Feature:** Displays a random Ayah from the Quran upon app refresh, enhancing the user experience with spiritual content.
 - * **Theme Customization:** Includes an option for users to switch between light and dark modes for a personalized viewing experience.
- **Live Demo**

Yummy App | *HTML5, CSS3, Javascript, jQuery, Bootstrap*

- The Yummy App is a dynamic web application designed to showcase a diverse collection of recipes from around the world. The app provides users with a visually appealing and interactive experience, allowing them to explore various dishes through different categories, regions, and ingredients.
- **Live Demo**

Todo App | *HTML5, CSS3, Tailwind, Javascript, React.js, Next.js, Firebase, Redux*

- Todo App is a robust and feature-rich web application designed to help users manage their tasks efficiently. The app provides a seamless and interactive user experience. Key functionalities include task creation, completion tracking, deletion, and filtering, with support for both light and dark themes.
- **Live Demo**

Movie SeaSug App | *HTML5, CSS3, Tailwind, TypeScript, React.js, Next.js*

- Developed Movie SeaSug, a user-friendly web application designed to enhance movie discovery and exploration. The app is divided into two main sections (search & suggest), each providing a unique and engaging user experience.
- **Live Demo**

Courses

- **Testing React Apps with React Testing Library with Code with mosh** , completed in 2024
- **Front-End Development Course at Route Academy**, completed in 2024
- **Web Development Diploma from Russian Cultural Center**, completed in 2018
- **Web Design Diploma from Armed Forces Information Systems Institute**, completed in 2017

Languages

- Arabic (mother tongue)
